

**github**  
SOCIAL CODING

The easy way  
“Replace bold words as you want”

Leonardo Moreno

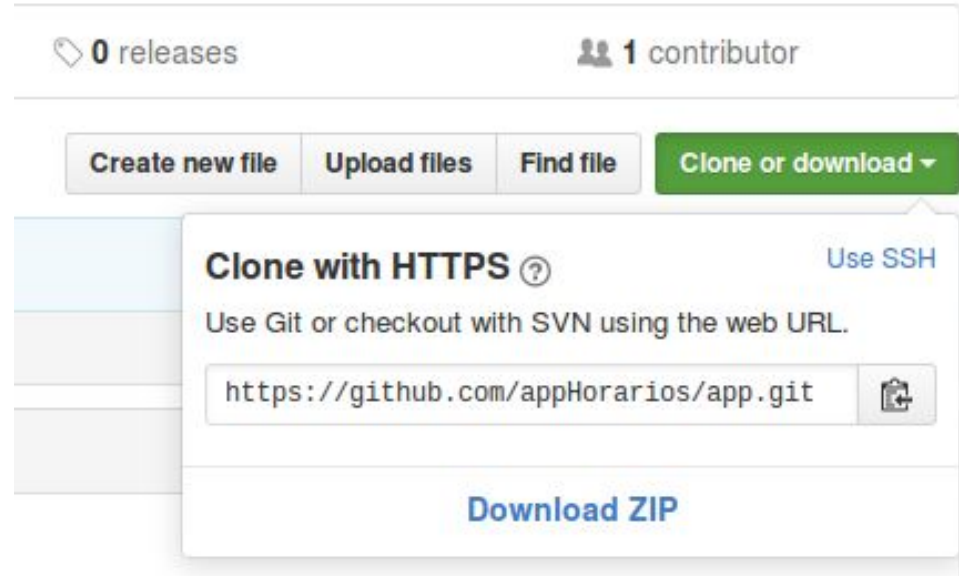

# 1. Cloning the repo

mkdir **myRepos**

cd **myRepos**

git clone <https://github.com/appHorarios/app.git>

git status

## 2. Modify a repository file

“Add or modify a file, save it in the repo.”

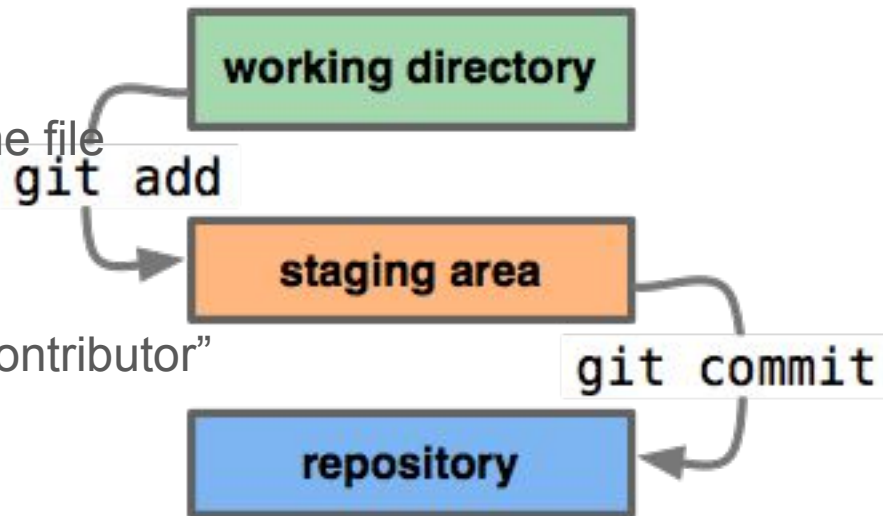

As an example, add your name to the readme file

```
git add README.md
```

```
git commit -m “Now Leonardo is an active contributor”
```

```
git push
```

\*Filling the blanks... user and password

### 3. Modify a repository file (Your own version, branching )

git branch **leoBranch** (Create a branch)

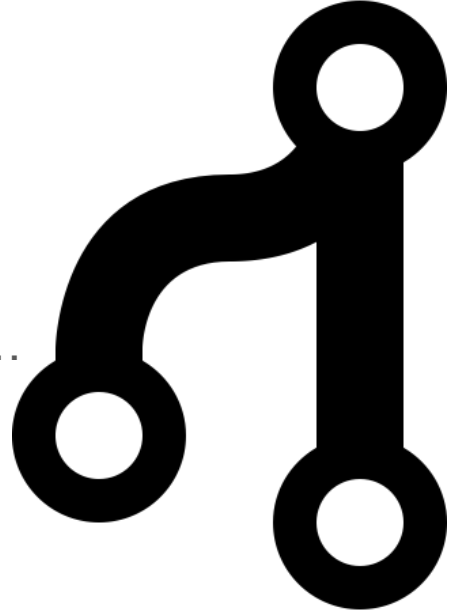

git checkout **leoBranch** (Switch to a brach)

In one line: git checkout -b **leoBranch** (create and switch)

Now modify files in the branch, add, commit and finally...

git push origin **leoBranch**

\*Filling the blanks... user and password

## \*. Update

To update your local repository to the latest commit, execute:

`git pull`

To check the working tree status, execute:

`git status`
